

Nimbus Cloud Storage Inc. — Internal Knowledge Base

Document version 4.2 — Last updated March 18, 2025

1. Company Overview

Nimbus Cloud Storage Inc. is a cloud file storage and synchronization company headquartered in Austin, Texas. The company was founded in 2016 by Elena Marsh, who continues to serve as Chief Executive Officer (CEO). The Chief Technology Officer (CTO) is Raj Patel, who joined the company in 2018 after leading infrastructure teams at a large telecom provider. Maria Gonzalez serves as Vice President of Sales. As of the end of the last fiscal year, Nimbus employed 340 people across four offices: Austin (headquarters), Denver, Dublin, and Singapore.

Nimbus's flagship product is a cloud storage and file-synchronization platform, also called Nimbus, that allows individuals and businesses to store, back up, and share files across devices. The company does not manufacture hardware and does not offer an on-premise (self-hosted) version of its software; Nimbus is available only as a hosted cloud service.

2. Product Tiers and Pricing

Nimbus offers four subscription tiers, billed either monthly or annually. Annual billing gives a discount equivalent to two free months compared to paying monthly.

Plan	Monthly Price	Storage	Max Devices	Support Response Time
Starter	\$9/month	100 GB	2	48 hours
Pro	\$29/month	2 TB	5	24 hours
Business	\$99/month	10 TB	20	4 hours
Enterprise	Custom pricing	Unlimited	Unlimited	1 hour

The Business plan's storage allotment of 10 TB is exactly five times the Pro plan's 2 TB allotment. The Starter plan does not include team-sharing features; team-sharing (shared folders with role-based permissions) is available starting with the Pro plan.

Nimbus offers a 30-day money-back guarantee on all monthly and annual plans. Refund requests made more than 30 days after purchase are not honored, except that customers who cancel an annual plan early receive a prorated refund for unused months, minus a \$15 processing fee.

3. Security and Compliance

All files stored on Nimbus are encrypted at rest using AES-256 encryption. Data in transit between a user's device and Nimbus servers is protected using TLS 1.3. Nimbus achieved SOC 2 Type II certification in 2020 and ISO 27001 certification in 2021. Both certifications are renewed annually through an independent third-party auditor.

Nimbus does not have access to customers' unencrypted file contents on the Business and Enterprise tiers when the optional 'Private Encryption Key' add-on is enabled; in that configuration, Nimbus support staff cannot recover a customer's files if the customer loses their private key.

4. Data Center Locations

Nimbus operates four primary data center regions: US-East (Ashburn, Virginia), US-West (Boardman, Oregon), EU-Central (Frankfurt, Germany), and APAC-South (Singapore). Customers on the Business and Enterprise tiers may choose which region stores their primary data; customers on the Starter and Pro tiers are automatically assigned to the region nearest their signup location.

5. Service Level Agreement (SLA)

Nimbus guarantees 99.95% monthly uptime for the Business and Enterprise tiers. This works out to a maximum of approximately 21.9 minutes of unplanned downtime per month. The Starter and Pro tiers are covered by a best-effort uptime target of 99.9% but are not eligible for SLA service credits. Business and Enterprise customers who experience downtime beyond the SLA threshold in a given month may request a service credit equal to 10% of that month's subscription fee for every additional 30 minutes of downtime, up to a maximum credit of 100% of the monthly fee.

6. API Rate Limits

Tier	Requests per Minute	Requests per Day
Starter	100	20,000
Pro	1,000	200,000
Business	5,000	1,000,000
Enterprise	Negotiated per contract	Negotiated per contract

Exceeding the rate limit returns an HTTP 429 status code. Enterprise customers negotiate custom rate limits as part of their master service agreement rather than using the fixed tiers above.

7. Product Version History

Version	Codename	Release Date	Key Feature Introduced
1.0	Launch	January 2016	Basic file storage and sync
2.0	Nimbus Sync	June 2019	Real-time multi-device sync
2.5	Nimbus Share	November 2021	Shared folders and link sharing
3.0	Nimbus AI Search	March 2023	AI-powered semantic file search
3.1	Nimbus Vault	September 2024	Private Encryption Key add-on

Nimbus AI Search, introduced in version 3.0, allows users to search for files using natural-language descriptions of their contents (for example, searching 'invoice from last April with a red logo') rather than relying only on file names. This feature is available on the Pro, Business, and Enterprise tiers, but not on the Starter tier.

8. Support Escalation Policy

Support tickets are triaged into three severity levels. Severity 1 (critical outage affecting an entire account) is escalated immediately to the on-call engineering team regardless of subscription tier. Severity 2 (significant feature degradation) follows the standard support response times listed in the pricing table in Section 2. Severity 3 (minor issue or feature request) is handled during normal business hours, Monday through Friday, 9 a.m. to 6 p.m. Central Time.

Enterprise customers are assigned a dedicated Technical Account Manager (TAM) who serves as the primary point of contact for all support issues and quarterly business reviews. Business-tier customers may purchase a TAM as a paid add-on for \$500 per month; this add-on is included at no extra cost for Enterprise customers.

9. Frequently Asked Questions

Q: Can I downgrade from Business to Starter at any time?

A: Yes, downgrades can be made at any time from the account settings page, but downgrading takes effect at the start of the next billing cycle, and any files exceeding the new plan's storage limit will be placed in a 90-day read-only grace period.

Q: Does Nimbus support two-factor authentication (2FA)?

A: Yes, 2FA via authenticator app or SMS is available on all tiers, including Starter, and is mandatory for all Business and Enterprise accounts.

Q: Is there a limit on individual file size?

A: The maximum individual file size is 5 GB on the Starter and Pro tiers and 500 GB on the Business and Enterprise tiers.

Q: Can I use Nimbus without an internet connection?

A: Nimbus supports offline access to previously synced files on desktop and mobile apps; changes made offline are automatically synced once connectivity is restored.

10. Contact Information

General support: support@nimbuscloud.example. Sales inquiries: sales@nimbuscloud.example. Security disclosures: security@nimbuscloud.example. Nimbus does not currently offer 24/7 phone support on any tier; all support is handled via email and in-app chat.
